Projects

Plant Diagnosis Application   Mar 2025 – present
- Designed a mobile plant diagnosis app that uses image recognition to identify plant diseases, pests, and care issues, enhancing user engagement through intuitive interactions.
- Created detailed wireframes exploring various layouts for scan results, actionable plant care insights, forums, and notification systems, ensuring usability and seamless user experience.
- Integrated user-centric design principles to ensure easy access to core functionalities such as plant scans, personalized care recommendations, and community engagement tools.

Work Experience

Freelance Artist   Jan 2020 – present | Mississauga, ON
- Conducted user research through client feedback loops to iterate and improve designs.
- Managed project workflows through design mockups, client communication, and timely deliveries.
- Designed high-quality digital illustrations, character designs, and branded emotes for notable content creators, including xChocobars, Kkatamina, and Neekolul.
- Sold over **$2,000** in Twitch emote commissions, enhancing brand visibility and client engagement.

Ui/UX Designer, *Rout3*   May 2024 – Sep 2024
- Redesigned the website to improve usability, visual appeal, and responsiveness across devices, resulting in an enhanced user experience.
- Created wireframes, interactive prototypes, and polished final designs in Figma, ensuring consistency with modern UI/UX standards.

Boba Barista, *Boba Blast*   Jun 2023 – Sep 2023 | Mississauga, ON
- Independently managed booth operations, including cash handling, customer interaction, and quality control for customized orders.
- Ensured high attention to detail in inventory management, preparation standards, and booth cleanliness.
